01 SUMMARY

Software engineer with more than a decade of experience building software for private companies and public entities. Full-stack background with a current focus on backend engineering, software architecture and distributed systems in the .NET ecosystem. I also design and build websites and digital experiences.

02 EXPERIENCE

APR 2026 – PRESENT

Alwon

Founding Engineer

Operational intelligence platform for retail. My work spans software architecture, backend engineering, systems integration, event processing, data platforms and artificial intelligence capabilities.

`TypeScript` `Next.js` `React` `Cloudflare Workers` `Supabase` `PostgreSQL` `LangGraph` `Zod` `Vitest` `Playwright`

MAY 2021 – FEB 2024 MIAMI, UNITED STATES · REMOTE

Weelo / Million and Up / Hola Car Rentals

Backend Expert Developer

Backend engineering across three products, working as part of their engineering teams on event-driven microservices in C#.

Weelo	Application for landlord–tenant interactions — screening, rent payments and reporting. Event-driven architecture with Kafka and C# microservices; CI/CD with Azure DevOps and App Center.
Million and Up	CRM for real estate in Florida. Migration of monolithic modules toward an event-driven architecture with Kafka and C# microservices.
Hola Car Rentals	Backend for a vehicle reservation platform in the United States — C# microservices, event-driven architecture with Kafka, automation, an OpenAI-based chatbot, CI/CD and Kubernetes.

`C#` `Microservices` `Kafka` `Event-Driven Architecture` `Azure DevOps` `App Center` `Kubernetes` `OpenAI`

SEP 2018 – MAY 2021 BOGOTÁ, COLOMBIA

Aportes en Línea

Senior Development Engineer

Development of internal applications and services, from conversational interfaces to serverless components on AWS.

Zipa	Internal application that gathers employees' interests and experience to support predictive assignment of requirements.
ChatBot AEL	Chatbot built with Azure LUIS and C#.
Datos en Línea	Financial query service based on PILA contributions, with an API and SFTP for bulk queries and serverless components on AWS.

`C#` `MEAN` `AWS` `Lambda` `Docker` `Azure DevOps` `Azure LUIS`

2013 - 2018

Evolution Technologies Group

Full-Stack Advance Developer .NET & Support Level 3

Front-end and back-end development, deployments and level-3 support.

ePx ECM	Enterprise content management product covering single-window services (ventanilla única), legal actions, treasury and collections, and document management.

ASP.NET · Oracle · SQL Server

03 TECHNICAL SKILLS

BACKEND	C# / .NET / ASP.NET Core / Web API / Node.js
ARCHITECTURE	Domain-Driven Design / Clean Architecture / CQRS / Specification / Unit of Work / Modular architecture
DISTRIBUTED SYSTEMS	Kafka / Event-Driven Architecture / Microservices
DATA	SQL Server / Oracle / MySQL / PostgreSQL / MongoDB / DynamoDB / EF Core / Dapper
FRONTEND	HTML / CSS / JavaScript / TypeScript / Angular
INFRASTRUCTURE	Docker / Kubernetes / CI/CD / Azure DevOps / AWS / Terraform
PRACTICES	Git / Scrum / Testing / Observability

04 BACKGROUND

UNIVERSITY STUDIES

Universidad Santo Tomás

Undergraduate studies in Ingeniería de Informática

2018-2021

Universidad Nacional de Colombia

Undergraduate studies in Ingeniería de Sistemas y Computación

2009-2013
